

CHANGE YOUR LIFE

WITH NATURAL ALKALINE & IONIZED WATER

A Combination of Reversed Osmosis Purifier and Alkaline Water Ionizer

Did you know that tap water and most bottled water have positive ORP (Oxidation Reduction Potential)?

It means that there is no antioxidant capacity and therefore that water cannot help the body in neutralizing acidity.

Medical studies show that alkaline ionic water has the most powerful antioxidant properties, better than vitamins A, C, E, Beta Carotene and selenium, which improve your body's defense against disease. In order to hydrate your body optimally, you need to drink water that is purified, alkaline, ionized, and mineral rich.

Eco Waterhouse Technologies System Features & Benefits:

Alkaline capacity: pH 9.0 ~ pH 10+, Ionizing capacity: ORP -150 ~ -250, Negative ions: 7,000 ~20,000 EA/cc

- The best alternative to expensive electric water ionizer
- Removes up to 99% of all contaminants such as **heavy metals, chlorine, chloramine, fluoride, pharmaceuticals, arsenic, pesticides and 300+ listed chemicals**
- Mineralizes water back with essential minerals
- Produces up to 30 gallons per day of purified, alkaline and ionized water
- Keeps high pH level for months
- Produces micro-clustered water for maximum hydration and cellular detoxification
- Removes harmful active oxygen (free radicals) which cause cancer, diabetes, hypertension, premature aging
- Removes acidic waste from the body caused by stress, modern diet, air pollution and environmental toxins
- A higher pH in the body reduces the need for fat and cholesterol to protect the body from damaging acids
- Water and nutrients are absorbed more effectively into the body
- Cooking with alkaline water improves taste and quality of foods
- Adjustable pH, from pH 9.0 to pH 10+

Our systems are manufactured and assembled in the USA. All components are certified by NSF.

You Will Improve Your Energy, Mood, Digestion, Hydration, Immune System & Weight Loss
